Introducing Our Newest Fabric:

In a continued effort to improve our products, we are using a new “custom” tri-laminate fabric for all covers (except roller covers), with a superior anti-abrasion quality. This fabric is a durable polyester/spandex blend laminate, with flame retardant urethane. It is fluid-proof, flame retardant, anti-microbial, and it’s soft, silky fell provides an elegant look that is easily wiped clean with just plain water! All our products can be machine washed and dried.

Washing Instructions

Machine wash, no fabric softener, dry in COOL dryer

Instructions For Use

(All covers are meant to fit snugly. Stretch carefully but firmly when “dressing” the machines.)

Bicep-tricep armrest cover: Curve is at front; slip corner facings over pad, stretch up and over the armrest and slip back corner facings over back corners of pad.

Glute Machine: Curve is at back, simply slip corner facings over each corner.

Seat covers: Front of Regular & Leg Extension/Curl has long facing that covers front edge of machine, back has 2 corner facings that slip around the 2 back corners. Oblique seat cover has 4 corner facings only.

All seat covers are marked on label for easy identification of back & front.

Hip Abductor Legpad covers: These should fit very tight and must be pulled snugly to stretch onto the pads. The inner pad covers have a keyhole opening to accommodate the knobs on the 2 inside pads.

Calfpad covers: Place over pad and pull tight, fastening the strap underneath.

Glute-Boot: This is a grease bushing cover, it slips over the grease bushing on the pivot arm, goes under the arm, and fastens up and around the inner side of the bushing. (This is for older machines that lack a grease cover)

Headrest cover: Just slips over the top of the chair back.

Booster cushion holder: Same as above, the nylon pouch that holds the cushion will be at the back of the seat when the headrest part is slipped over the chair back.

Shoulder pad covers: For the Squat machine just slip on over the pads.

Wedge Cushion Cover: This slips on like a tight fitting pillow sham.

Handle Covers: These are meant to fit fairly snug. There are several sizes of handles on machines so please ask for a sample to ensure proper fit prior to ordering volume.
